Testimonial

"Operation Hammond has worked with AnimeNEXT as our exclusive vendor for first aid / community wellness services for several years and they have constantly exceeded expectations year after year. The team is professional, punctual, and flexible. This skill set is what allows them to quickly and efficiently deal with any of the onsite issues that arise at our convention. Should an issue arise, they are thorough with their communications and make sure that all relevant parties are aware of what had transpired. Any event would benefit from have Operation Hammond onsite to provide support to their attendees as their presence only serves to further increase a positive convention experience."
